WEATHER KEY POINTS

08/05/21 - 08/11/21

Thursday-Friday

- Dry weather is expected for the majority of the state, though a few isolated dry thunderstorms could occur across far northern California Thursday.
- Critical fire weather conditions are likely for much of northeast California, including the northern Sacramento Valley and northern Sierra through Thursday due to gusty winds up to 35 mph and low humidity levels
 - Any new or existing fires could spread more quickly with these expected conditions
 - Isolated dry thunderstorms are possible over far northern California today as well
 - Elevated to briefly near-critical fire weather conditions are also possible across the central and southern Sierra as well as southern California mountains and nearby valleys today with gusty winds of 25 to 35 mph.
- Hot temperatures will continue across much of interior southern California through Thursday
 - High to locally very high heat risk impacts are expected over interior portions of southern California today, with readings of 105 to 120 degrees, especially across the deserts.

Saturday-Wednesday

- Cooler temperatures make a return to most of the state through the weekend and early next week, though with a brief day of hotter temperatures of 100 to 105 degrees for the Central Valley Saturday
- Fire weather conditions remain elevated each afternoon for the mountains and foothills due to locally gusty winds, though widespread fire weather conditions are not expected
- Some monsoon moisture could make a return to southern California by late in the weekend or early next week, though the exact timing or coverage of any showers and storms remains quite uncertain
